

The Multiplier event of the project SEDUCA happened in Lublin, Poland 9 June, 2023

Main objectives of the ME

- to share the knowledge about the importance of sexual education among young people in order to prevent toxic behaviors
- broaden the knowledge about sexual education in order to prevent the development of STD
- the integration of young people of various ethnicities and cultures
- to share the information about the project and its results

Target group

- Young people aged 16-30 from intercultural community - 45 people

The description of the event

The event happened on 9th June from 14:00 - 18:00.

14:00 - 14:45 The event started with the greeting of the participants and a short introduction.

14:45 - 15:30 We talked about the project Seduca and shared the main goals and objectives of it

15:45 - 17:30 The workshop on sexual education was held. During the workshop the participants were informed about the toxic behaviors among young people in Croatia, Spain, Greece, Italy, Poland and how to prevent them. We had a short quiz on how to avoid STI and what to do if you have one. The participants in mini groups worked on the topic of how to share the knowledge about sexual education in their countries. The participants tried out the game in Genially about toxic behaviours

17:30 - 18:00 The sum up of the event and sharing the knowledge about the results of the project SEDUCA and it's events

The main outcomes of the Multiplier Event

- The participants are aware of the various kinds of preventions of toxic behaviors among their peers
- The participants got acquainted with the Erasmus+ programme and Seduca project, it's results and outcomes
- The participants are aware of how to prevent the development of STI and the ways of prevention them
- The participants developed clear communication style in order to establish the borders against the toxic communication and interactions
